

Technical Documentation to Support Development of Minimum Flows and Levels for the Caloosahatchee River and Estuary

Appendices

Contents

<u>Title</u>	<u>Page No.</u>
Appendix A - Caloosahatchee River MFL Research Program Progress Report	A-1
Appendix B - Effects of seasonal and water quality parameters on oysters (<i>Crassostrea virginica</i>) and associated fish populations in the Caloosahatchee River.	B-1
Appendix C -- Impacts of Freshwater Inflows on the Distribution of Zooplankton and Ichthyoplankton in the Caloosahatchee Estuary, Florida	C-1
Appendix D -- Salinity Tolerance of <i>Vallisneria</i> and Salinity Criteria	D-1
Appendix E -- CERP Projects in the C-43 Basin	E-1
Appendix F -- Hydrodynamic and Salinity Modeling	F-1
Appendix G -- The Significance of Tidal Runoff on Flows to the Caloosahatchee Estuary	G-1
Appendix H -- Development of an ecological model to predict <i>Vallisneria</i> <i>americana</i> Michx. densities in the upper Caloosahatchee Estuary: MFL update	H-1
